ABOUT OUR LED PRODUCTS

Our LED product sales volume continues to increase every year – here's why...

- Super Long Life.
- LED is a "Pay Back" light source because of the huge reduction of power consumption – at least 75% less power than incandescent bulbs.
- Brighter and More Magnificent Colors
- All LED products laboratory tested. Each must meet the highest quality standards.

**BRIGHTEST & BEST
QUALITY ON
THE MARKET TODAY!**

"Of all the LED C-7 & C-9 LED bulbs we have tested – Those from Action Lighting tested "BEST WE HAVE EVER SEEN" they are dimmable & perform great when chased with a controller."

CHASERS & FLASHERS CHANNEL

model
204CH/MEC33-C4
shown

MODEL 33 (3, 4 or 5 CIRCUIT) CHASERS

Model 33 Chasers are most commonly used on flashing incandescent bulb signs where "dark spots" chase around a border or directional motion is incorporated into a field of bulbs. The Model 33 can be used to chase neon when installed on the primary side of any transformer. Model 33 Chasers are stocked in three, four, or five circuits. Larger chasers and 220 volt models are available by special order.

- 115 volt motor, 50/60 cycles.
- UL and cUL listed
- Ruggedly constructed to provide years of smooth, trouble free service
- Heavy duty silver alloy contacts for maximum life
- Shielded, no-maintenance ball bearings guard against dust & moisture
- Flashing speed can be easily adjusted by removing motor shades using a screw driver, as shades are removed the flashing speed decreases (see specifications below).

MODEL 66 (4 CIRCUIT) HIGH SPEED SCINTILLATOR or CHASER

The Model 66 is generally used to create a scintillating or "twinkling" action in fields of flashing bulbs. They can also be wired to create a chasing action. These units are constructed of very heavy duty materials to stand up under constant use with heavy loads. Simple wiring design for easy installation. Larger chasers and 220 volt models are available by special order.

- 115 volt motor, 50/60 cycles
- UL and cUL listed
- Ruggedly constructed to provide years of smooth, trouble free service
- Heavy duty silver alloy contacts for maximum life
- Shielded, no-maintenance ball bearings guard against dust & moisture
- Weight 7 lbs; Dimensions 7" x 6" x 4"
- Flashing speed can be easily adjusted by removing motor shades using a screw driver, as shades are removed the flashing speed decreases and load capacity changes (see specifications below).

- When operating with shades ON: Contacts are rated at 12.5 amps each
430 flashes per minute
